EXAMINER'S AMENDMENT

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on March 24, 2004, the examiner requested an extension of time for two MONTH(S) and authorized the Director to charge Deposit Account No. 07-1897 the required fee of \$110 for this extension and of \$ 122 for the additional three claims and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stephen M. Evans on March 24, 2004. During the examination process, the examiner has discovered that the claims submitted in the Amendment filed January 26, 2004 did not belong to the current application. The attorney has proposed a new set of claims as shown in Exhibit A. Claims disclosed in the January amendment will not be considered.

The claims have been amended as disclosed in the Exhibit A.

Allowable Subject Matter

3. Claims 2-21 and 24-28 are allowed over the prior art of record.
4. The following is an examiner's statement of reasons for allowance:

Liberman (5,792,489) teaches a plaster spreading tool, comprising a gripping body (20), an elongated, resilient channel member (60) on the body for retaining and pressing a line of material into a recess or a corner, a finishing portion (22, 24) on the body for compressing and shaping the material after delivery of material; wherein the channel member (60) is mounted to at least two anchor points on the body (141a) by a resilient band (142), in which the finishing portion of the body is position after the channel member (Fig. 1).

Liberman, however, fails to teach or suggest that the channel member comprises a pair of a spaced side walls that define an elongate cavity facing away from the body to receive a line of grout; or the body includes an arcuate surface and the resilient channel member is mounted adjacent the arcuate surface with imparts an arcuate shape to the channel member over the length of the channel member; or a scraping portion includes a resilient surface to engage the tile.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thu Khanh T. Nguyen whose telephone number is 571-272-1136. The examiner can normally be reached on Monday- Friday, 6:30-4:00.
